

## **inTEST Thermal Solutions Signs ACA TMetrix as Exclusive Distributor for Thermal Products in Canada**

### **ACA TMetrix Adding Thermal Test and Process Cooling Systems to Technology Portfolio**

Mansfield, MA USA – November 1, 2021 – inTEST Thermal Solutions, a global supplier of innovative temperature test and process cooling solutions utilized across a wide range of markets, including automotive, defense/aerospace, industrial, life sciences, semiconductor, and telecommunications, today announced that ACA TMetrix, a long established and leading distributor of design and test tools, has entered an agreement as the exclusive distributor for inTEST Thermal Solutions products throughout Canada.

“ACA TMetrix has provided Canada with sophisticated technology design tools as well as test and measurement instrumentation for over fifty years. As Canada’s technology sector continues its rapid growth, the highly engineered thermal test and process cooling solutions offered by inTEST Thermal Solutions will bolster ACA TMetrix’s offerings, helping their customers to increase production and design capabilities of the next generation chips, electronics, and materials”, remarked Barry Johnson, Director of Sales at inTEST Thermal Solutions.

The inTEST Thermal Solutions product portfolio, consisting of Temptronic ThermoStream® Air Forcing Systems, Sigma Systems® Thermal Chambers and Plates, and Thermonics® Process Chillers, will both compliment and expand ACA TMetrix’s current lineup of test and measurement tools. “As our customers continue to develop cutting edge products and technologies, their need for more advance temperature control and thermal management systems are growing.”, commented Patrick Leung, Vice President and General Manager of ACA TMetrix. Mr. Leung continued, “Our collaboration with inTEST Thermal Solutions strengthens our position as a complete technical and logistical solutions provider for our test & measurement customers while expanding our offerings into process control and industrial cooling”.

The agreement between inTEST Thermal Solutions and ACA TMetrix positions both companies to respond jointly and strongly as the semiconductor industry in North America shifts in response to global supply chain challenges and growing demands for localized chip and technology development.

### **About inTEST Thermal Solutions**

inTEST Thermal Solutions (ITS) specializes in the design and manufacture of thermal test and process cooling systems. Our breadth of products and in-house engineering capabilities allow us to be a single-partner-solution for thermal test and process cooling needs. We are recognized globally for our expertise in precise control of extreme thermal environments, from -185 to +500°C, with rapid transitions or long dwell times. The ITS family includes three product

brands: Temptronic, Sigma Systems, and Thermonics. inTEST Thermal Solutions is a wholly owned subsidiary of inTEST Corp, Mount Laurel, New Jersey, USA (NYSE America: INTT).

### **About ACA TMetrix**

ACA TMetrix Inc. is a leading Canadian distributor of test and measurement instruments and design tools. For over 55 years we have provided products manufactured by the world's leading instrument manufacturers. The company is a subsidiary of Allan Crawford Associates (ACA), one of Canada's largest distributors of imaging, embedded computing, test equipment, scientific instrumentation and custom-engineered solutions.
